Phoenix Treatment Centre, 4 St Johns Road, Taunton, Somerset TA1 4AZ

*Male and female clients welcome  
Qualified Cosmetic Practitioners / GP Doctors*

PROFESSIONAL COSMETIC REJUVENATION

## Professional GP's at your service

Based in Taunton, Somerset, Phoenix Treatment Centre is run by General Practitioners and Qualified Cosmetic Practitioners Dr Mike Wolfman and Dr Rick Bowley. Supported by an expert medical team, Phoenix Treatment Centre is dedicated to providing a professional and quality service, combined with a relaxed and friendly attitude!

During your initial consultation at Phoenix, we will discuss your needs to carefully determine the best treatment, individually tailored to you. Our wide range of treatments are all non-invasive and are therefore virtually painless with minimal health risks.

For the majority of our treatments, we use the latest in laser technology, meaning our patients often experience dramatic results with almost no recovery time. So you can be straight back up on your feet immediately after the treatment, feeling rejuvenated and radiant!

## The Treatments

Phoenix offers a wide range of treatments covering over 20 applications. The majority of treatments carried out at the Centre use our sophisticated laser technology, however, we also offer non-laser semi permanent wrinkle reduction solutions such as BOTOX® and RESTYLANE®.

### Treatments for men

Phoenix also offers treatments specifically for male patients, such as shaving bump reduction, treatments for acne scarring, and of course... wrinkle reduction is not just for the ladies!

## What is Laser Surgery?

Cosmetic laser surgery is a non-invasive treatment that uses a hand held laser to generate heat energy, altering the surface of the skin and often dramatically enhancing the appearance. Since a laser beam can focus on a precise area, it can be used to operate on even the most delicate of skin types.

It is a safe and effective way to:

- reduce unwanted body and facial hair
- soften or remove wrinkles, scars and discolouration from the skin
- treat unsightly leg veins

### Some of the reasons our patients visit us...

- Permanent hair reduction
- Wrinkle & fine line reduction
- Leg and facial veins
- Birthmarks
- Acne
- Age spots
- Shaving bumps
- Collagen regeneration
- Rosacea (facial redness)
- Melasma (skin pigmentation)
- Telangiectasia (small blood vessel marks)
- Angiomas (blood blisters)
- Venous lake (blue nodule caused by superficial pooling of blood)
- Post Trauma Hyperpigmentation (darkening of the skin)

## Cosmetic Laser Surgery

Our non-invasive treatments are carried out on the state of the art 'Gemini' laser machine. By combining two lasers in one, the Gemini provides faster, more effective treatment for almost all laser procedures, and is one of the safest and gentlest lasers in use today.

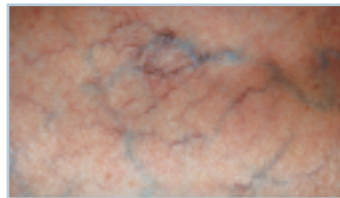

The laser offers a wide range of solutions, including permanent hair reduction, removal of leg and facial veins, adult acne, birthmarks, and shaving bumps. The application time depends on the treatment and area coverage required.

**Before** - shaving bumps

**After** - shaving bumps

**Before** - leg veins

**After** - leg veins

### Photo Rejuvenation

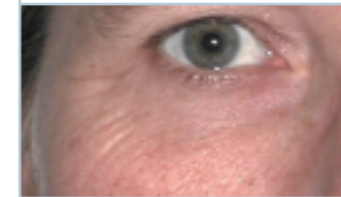

A non-surgical face lift can be performed with photo rejuvenation by gently delivering light energy that is absorbed by the skin to stimulate the production of collagen. Collagen helps soften the appearance of ageing skin by decreasing fine lines, wrinkles, sun damage, age spots, skin blemishes and redness such as rosacea.

The procedure takes only 15 to 30 minutes depending on the areas that need to be treated.

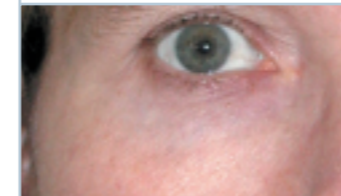

### Dermal Fillers

Dermal fillers have a wide range of uses such as relaxing facial muscles and reducing frown marks, smoothing wrinkles, plumping lips and adding contour to the chin and cheeks. The fillers are non-animal products consisting of hyaluronic acid - a natural chemical constituent of the skin.

Procedures take approximately 30 minutes, possibly longer depending on the areas to be treated. The treatment results are instant and leave skin looking fresher for up to 9 to 12 months.

**Before** - wrinkle reduction

**After** - wrinkle reduction

**Before** - RESTYLANE

**After** - RESTYLANE

RESTYLANE is a trademark owned by Q-Med AB

### Botulinum Toxin (BOTOX®)

BOTOX temporarily blocks the nerve endings to the facial muscles, causing them to relax. By reducing muscle movement, creasing is prevented and the skin is allowed to recover, causing fine lines and wrinkles to soften and fade away.

The treatment involves injecting very small doses of BOTOX via an extremely fine needle into the appropriate area. The procedure takes approximately 15 to 30 minutes and results can last for 3 to 4 months, sometimes longer after several treatments.

### RESTYLANE®

RESTYLANE is a natural beauty lift using material found in the body. A crystal clear, non-animal, biodegradable gel is injected into the skin in tiny amounts with a very fine needle. The gel smoothes wrinkles and fine lines and can be used to add natural volume for fuller lips.

The procedure will often take less than 30 minutes and the result is instant, with natural enhancement often lasting up to six months.

## The Phoenix Experience

### How long will treatment take?

This will depend on the treatment required and the size of the area to be treated. Some treatments will need to be re-administered more than once to gain the full benefit.

### Will it hurt?

The majority of the procedures we offer are non invasive and therefore virtually painless. BOTOX and RESTYLANE need to be administered with a small injection. During laser treatment, some patients may experience a slight tingling or stinging sensation, however, a built in cooling system does minimise this feeling. An anaesthetic cream can be used for sensitive areas prior to the treatment. More information regarding the specific procedure required can be covered during your consultation.

### Will I need time to recover?

Some patients may experience a slight redness of the skin after a treatment. Recovery time for the redness to disappear can vary between a few hours and a few days depending on the treatment that has taken place.

### What results will I see?

During your full consultation, Phoenix will be able to assess your treatment and discuss the results you can expect to see. Before and after photos specific to your treatment will be available so that you can see how the procedure has worked in the past.

### How much will it cost?

Since we tailor each treatment to the individual needs of the patient, costs do vary. We will discuss specific costs with you at your initial consultation once a treatment has been determined.

## A new you?

*Want to feel rejuvenated and radiant?  
Not sure if cosmetic surgery is for you?*

Just get in touch with Phoenix to book in a free consultation with Mike or Rick. They can cover any questions you may have about your individual needs, and tell you more about the treatments available, how they will be carried out, how many procedures you will need to have, and what you can expect to see at the end of the course.

To arrange your consultation, please call or email, or visit our website for more information:
